

Anurag Kumar

Durgapur, West Bengal, India | [Email](#) | [GitHub](#)

EDUCATION

National Institute of Technology, Durgapur

B.Tech in Biotechnology

Durgapur, WB, India

2025 – 2029

EXPERIENCE

Design Engineer

June 2026 – Present

Beanstalk

Remote

- Architect and engineer user interfaces and web applications with a focus on frontend performance and component scalability.
- Collaborate across engineering and product teams to refine design systems and frontend developer tooling.

Design Engineer

Oct. 2025 – Jan. 2026

Cleopetra

Remote

- Engineered trading interfaces for token pair liquidity pools, supporting over \$30M+ in total deposits and enabling LPs to earn over \$2M+ in fees.

Lead Engineer

Sept. 2022 – July. 2023

Candypay

Remote

- Architected frontend infrastructure and payment interfaces on top of Solana Pay adopted by 500+ ecosystem teams (including Solana Foundation and Prospera Global), engineering two production web apps (user dashboard and checkout platform) and releasing a custom React checkout SDK.
- Processed over \$120,000 in total transaction volume across integrated merchant platforms.
- Secured 4th place in the Payments Track out of 750+ submissions at the global Solana Summer Camp Hackathon.

Developer

Feb. 2022 – May 2022

Metapass

Remote

- Built and maintained user-facing frontend components for event creation and ticket distribution flows on Solana.
- Integrated smart contract interaction logic with frontend state management for secure on-chain ticketing.

PROJECTS

Kotiri | *Go, Redis Protocol*

2024

- Built a lightweight, in-memory key-value data store in Go supporting fundamental Redis operations.
- Implemented networking interfaces compatible with standard `redis-cli` interactions.

React & Next.js Snippets | *TypeScript, VS Code Extension*

2023

- Published a VS Code extension for React and Next.js shortcut snippets, used by over 30,000 developers.

ACHIEVEMENTS & HONORS

Hackathon Winner

2023

Global Competitions

Online

- Won 3 global hackathons: Solana Sandstorm with Caramel (npm monetization protocol), alongside hackathons hosted by Hashnode and thirdweb.

Technical Publications

2022 – Present

Hashnode & Dev.to

Online

- Authored technical articles on frontend architecture, web tooling, and Web3 development, reaching over 60,000+ total readers.

TECHNICAL SKILLS

Languages: TypeScript, Go

Frameworks & Libraries: React, Next.js, Svelte, Hono, Node.js

Databases & Storage: PostgreSQL, MySQL, Redis
